

# GUIDE TO THE GARDEN

Help us preserve this fragile historic garden. Please do not touch the plants.

## Special Events at Green Animals

Every year Green Animals hosts several popular events, including the Plant Sale in mid-May and a festive Children's Party mid-July.

## The Topiaries

# An Historic Country Estate on Narragansett Bay

## 1. Damask Rose Garden:

Roses have always graced the entrance to the garden and the Damask Roses *Rosa damascena* were in place when Thomas Brayton purchased the property in 1877.

## 2. Topiary Border:

This border contains some of the oldest topiary on the property. The geometric designs and shapes have changed over the years, and new topiary is added and renovations made, as necessary.

## 3. Formal Garden:

A formal parterre edged in *Buxus microphylla* var. *japonica* 'Morris Midget' Boxwood. Each year a new spring bulb display followed with new flowering annuals is planted, surrounding the oldest and most famous topiary forms. These topiaries were started in 1901 in a nursery area, and then moved to their present location in 1912. The formal garden was renovated in 2013.

## 4. Orchard Beds:

Once planted with a variety of peach, plum and cherry trees, the orchard beds now host crabapple trees, under planted with an assortment of perennials.

## 5. Upper Topiary Lawn:

Made from California privet (*Ligustrum ovalifolium*), these animals were added to the garden after 1920.

## 6. Teddy Bears & Unicorn:

The most popular topiaries are the teddy bears made of yew (*Taxus*). The unicorn is made from California privet. All were created in the 1970s.

## 7. Spot the Dog, Yew Rooster & Baby Giraffe:

Spot the Dog and the Yew Rooster were created in the 1970s. Spot is named for the variegated privet on its hind leg. The Baby Giraffe is a newer addition to the garden, having been planted out in 2004 and rebuilt in 2017.

## 8. Dahlia Garden:

Green Animals' original estate gardener, Joseph Carreiro, was a dahlia enthusiast. The Dahlia Display Garden continues this tradition and is a joint project between The Preservation Society of Newport County and the Rhode Island Dahlia Society. Blossoms from this garden are entered into the Dahlia Society's annual show held in early September. For more information, please visit: [www.RhodeIslandDahliaSociety.org](http://www.RhodeIslandDahliaSociety.org).

## 9. Gourd Arbor:

Planted annually with gourds.

## 10. Fish Pond:

Dating to the 1920s, the fish pond was renovated in 2005, thanks to a generous donation by The Newport Horticultural Society. The fountain was added in 2012.

## 11. Bamboo:

This variety of running bamboo, *Phyllostachys aureosulcata*, is highly invasive and must be mown around regularly to be kept in check.

## 12. Pet Cemetery:

The Brayton family had a long history of raising award-winning show dogs. Alice Brayton's beloved Lhasa Apsos are buried here. Dozens of dog show ribbons are displayed in the house, on the 2nd floor.

## 13. Crown:

Planted with California privet and Handsworth boxwood (*Buxus sempervirens* 'Handsworthiensis').

## 14. Cutting Garden:

Both perennials and annuals are used for fresh and dried arrangements which are displayed in the Brayton House.

## 15. Figs:

Native to the Mediterranean, the brown and white figs thrive in the moderate coastal conditions and sheltered microclimate of a west-facing slope.

## 16. Vegetable Garden:

In the estate's heyday, the vegetable beds filled the entire upper lawn area. Today the garden is used for educational purposes and produce from it is donated weekly to local charities. George Mendonca's handcrafted scarecrows, dating to the 1940s, still welcome visitors to explore over 100 varieties of vegetables and herbs.

## 17. Espaliered Fruit Trees

## 18. Berries:

Red currant *Ribes sativum*, Gooseberry *Ribes uva-crispa*, High-bush Blueberries *Vaccinium corymbosum*, Low-bush Blueberries *Vaccinium angustifolium*, Foxberry *Vaccinium vitis-idaea*, Golden Raspberry *Rubus idaeus* 'Fall Gold', Raspberry *Rubus idaeus* 'Heritage', *Lycium barbarum* Goji Berry

## 19. Perennial Border:

The perennial border planting scheme emphasizes late summer and early fall bloom. Note the uncommon *Poncirus trifoliata*, Hardy Orange tree, at the far end of the border. The working coldframes, opposite the perennial border, are used to help in the production of Green Animal's seasonal plantings.

## 20. Arbors:

The Grape Arbor (*Vitis vinifera*) and the Saucer Magnolia Arbor (*Magnolia x soulangeana*).

## 21. Scottie the Dog, Birdbath & T-Rex Topiaries:

The Birdbath was re-shaped and re-designed in 2015.

## 22. Giant Reed Grass:

Giant Reed Grass *Arundo donax*. Growing up to twenty feet in one growing season, the canes can be cut and dried and used for garden structures and fencing.

## 23. Copper Beech Tree:

(*Fagus sylvatica Atropunicea*).

It is approximately 160 years old.

## Beech Nursery:

The Preservation Society's 88 acres of landscapes across 11 historic properties in Newport County include more than 1,800 trees – many of them beeches. This nursery of young European Beech trees will provide replacements for beeches that are lost to storms, age and disease.
